Purchasing Management eXtra – New Release Web-Enabled Requisition Module Version 4.7.W3

PMX 4.7 W2 is currently undergoing enhancements, including updates to the basic security features of the product and a conversion of the underlying code to a new compiler.

Although the user interface will remain unchanged, the technical nature of these changes is significant. In order to provide all customers with the best possible product and support, we have suspended shipment of the current web product until PMX 4.7 W3 has completed testing.

We anticipate the conclusion of Beta testing and delivery beginning June 2006 All existing customers will automatically receive an update at that time.
