- Web-Based Solutions - Leading e-Procurement vendors are now focused on delivering Web-based applications that utilize the Web as part of their platforms
- NEWSWORTHY ANNOUNCEMENTS

**Web-Based Solutions - Leading e-Procurement vendors are now focused on delivering Web-based applications that utilize the Web as part of their platforms**

Leading e-Procurement vendors are now focused on delivering Web-based applications that utilize the Web as part of their platforms. With these solutions, you don't need to distribute software to all of your employees because the application runs over the Internet. Generally, Web-based applications are cheaper and easier to manage than their client- server based counterparts.

Fax 502-423-8963

**CUSTOMER SUPPORT CORNER** - Technical Tidbits

Adding a new user to the PMX system

Create a Password Security record and an Employee Control record for the new user. Create both records with the same ID so they can link up properly.

Install the Crystal runtime files on the workstation. This can be done by executing SETUP.EXE found in the Crystal folder on the latest Installation or Upgrade CD sent.

Create a short cut icon on the workstation. It should be identical to a current user running the PMX system. Map the appropriate drive letter if needed.

For SQL users only - establish the DSN connection on the workstation.
